Synthetic wine made without grapes claims to mimic fine vintages

<https://www.newscientist.com/> - 17/05/2016

"We can turn water into wine in 15 minutes." So claims the Ava Winery, a San Francisco start-up that is making synthetic wine without grapes – simply by combining flavour compounds and ethanol.

California winery hires earthworms to clean up its wastewater

<http://www.theguardian.com/> - 17/05/2016

A glass of wine can require as much as 14 gallons of water to make, prompting Fetzer Vineyards to try a wriggly wastewater solution invented in Chile.

Study compares wines from diseased and healthy vines

<https://news.wsu.edu/> - 17/05/2016

Grapevine leafroll disease (GLD) has plagued vineyards for centuries, but little is known about how this virus impacts the fruit quality and actual wine produced from grapes of affected plants.

Bacteria carrying bug threatens wine industry

<http://www.abc10.com/> - 17/05/2016

Pierce's disease: new research could save California wine

Wine grape growers weigh in on Cabernet Sauvignon clones

<http://www.goodfruit.com/> - 17/05/2016

Cabernet Sauvignon grapes are ready for harvest at Cold Creek Vineyard in 2015. The vineyard has 132 acres in Cabernet clones. "We know clones bring different attributes that can contribute to different wines," says vineyard manager Joe Cotta.

A mayor altura de la vegetación del viñedo, más concentración de azúcar en la uva

<http://www.tecnovino.com/> - 17/05/2016

Según un estudio realizado por investigadores del Centro de Investigaciones Científicas y Tecnológicas de Extremadura (Cicytex) elevar la altura de vegetación del viñedo incrementa la concentración de azúcar en la uva.
