### Watering down the impact of climate change on vineyards

The Lead

Watering dormant vines during winter in dry seasons is far more effective at maintaining yields and quality than waiting until spring, a three-year study in South Australia has found.

### This year's California wine harvest might be normal, for a change

The San Francisco Chronicle

Over the last few years, California wineries have gotten used to freakishly irregular harvest seasons. Drought and heat have forced extraordinarily early picking; wildfire has threatened entire regions. But somehow, despite all the chaos that natural disasters have brought over the last 12 months,
